15% Case Study Report and Presentation and 5% Case Study Discussion
30% Mid semester Exam
35% Final Exam during Exam Period

STUDENT REVIEW

"Group work is a big component, so make sure that you do it with some friends." "With the group work, there is also a component where your group will need to question the group that is presenting."

"Mostly quantitative content; a strong background in calculating annuities, CAPM rates and options would be highly useful. Some weeks have a lot more content than others."

"Revisits calculation components as well as the MM theory from FINS1613."

"Read the textbook and do as many questions as you can."

"Kyung's exams tend to be hard but if you've kept on top of your work every week it's definitely manageable."
